

# LATITUDE 1000

"The Art of Heating"

FLOATING PLINTH

REUSABLE AIR FILTERS

FLEXIBLE INSTALLATION

WIDE FLAME DISTRIBUTION

DOUBLE GLAZED GLASS

- Australian Made & Designed**

The Cannon Latitude's modern design was born from a need to create a high performance, contemporary designed heater, for Australian homes. The heater is proudly made in our manufacturing facility, in Geelong, Victoria.
- Room Sealed Technology**

Powerflue operation draws air in from outside for combustion via the fresh air inlet and vents back outside via the flue exhaust outlet. This ensures cleaner air, safer operation, flexible installation options and highly efficient heating.
- Floating Plinth**

The Cannon Latitude's floating plinth design elevates the fire bed, highlighting the comforting visual appeal of the flame and log setting.
- Efficient Heating**

The Cannon Latitude (1000mm) is a 4.4 energy star rated heater which translates to 82% thermal efficiency, more economical to operate than lower star rated models.
- Wide Flame Distribution**

The Cannon Latitude with its designer multi-port burner has been designed specifically with front and rear channels that delivers an authentic flame pattern and spans across the entire width of the firebox chamber.
- Wide Viewing Window**

With the wide viewing window, slim fascia and reflective firebox panel that truly capture the essence of luxury comfort in the home.
- Reuseable Air Filter**

Assurance the air you are breathing is clean with the capture of dust particles which prevent them entering your environment.
- Flexible Installation**

The Cannon Latitude is designed with installation flexibility which allows up to 15 metres of flue to be used.
- Minimal Frame Dimensions**

The Cannon Latitude only requires a minimum frame cavity depth of 402mm providing a slimline appearance.
- Double Glazed Glass**

Having double glazed glass provides clear unobstructed viewing inside the firebox and no requirement for a mesh guard.

# Zero Clearance

The Cannon Latitude fireplace is rated a zero clearance heater so you do not need to build a fire rated wall construction. You can install this heater directly onto plasterboard with a timber framed cavity, as the heater has spacers built into the sides preventing combustible surfaces touching the panels of the heater

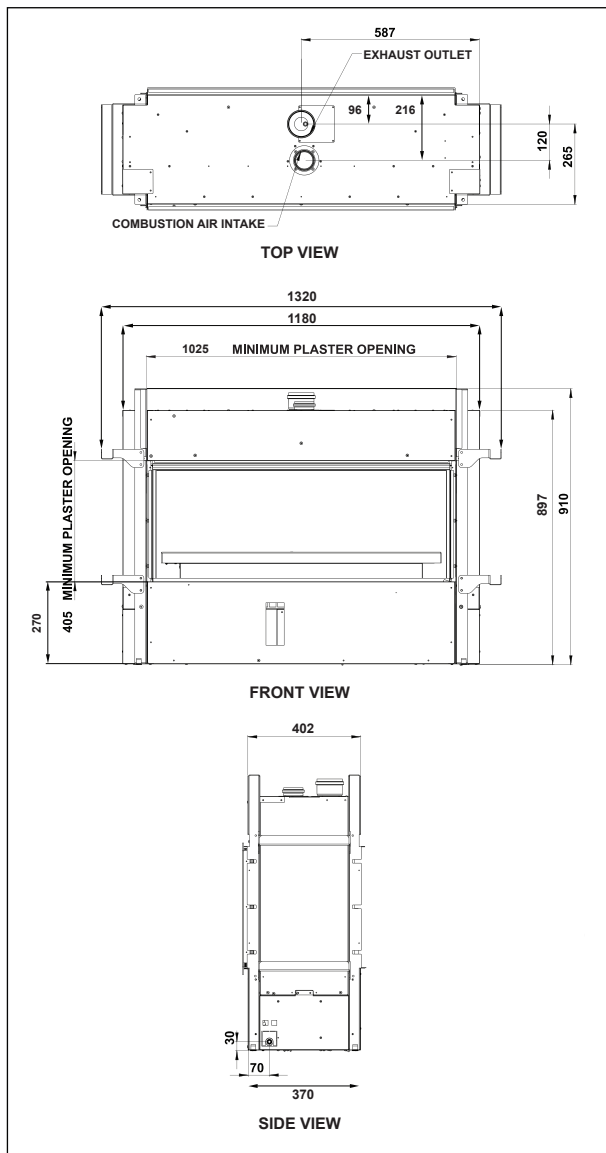

FIG 1

# Cannon Latitude 1000 Specifications

Gas Type	Natural Gas
Gas Consumption	33.5 MJ/hr input
Energy Output	8.4kW / 30.2 MJ/hr
Energy Star Rating	4.4 stars
Operating Pressure	Natural gas 0.80 kPa (high) / 0.40 kPa (Low)
Gas Regulator	Integral part of controller
Min. Inlet Pressure	1.13 kPa (NG)
Fan	3 speed
Ignition	Electronic direct spark
Power Requirement	240V AC 10 Amp Switch socket
Removable Air Filter	Yes
Heat Settings	3
Air Room Fans	2
Flue Type	Powerflue for horizontal & vertical application
Flue Air Inlet	ø 61mm
Flue Exhaust Outlet	ø 81mm
Burner Beds	2
Minimum Cavity Dimensions	Height 910mm Width 1320mm Depth 402mm
Weight	135Kg
Overall Dimensions	Refer to FIG 1
Remote Control	Included

<b>Viewable Glass Area</b>	1000mm x 380mm	<b>Floating Plinth</b>	Enamelled Grey or Black
<b>Fascia Finish</b>	Painted Aluminium	<b>Fire Bed Media</b>	Traditional Logs / Stylised Logs
<b>Fascia Sizes</b>	25mm	<b>Flue Type</b>	Horizontal & Vertical Powerflue
<b>Fascia Colours</b>	Black or Silver		

Latitude is designed, manufactured and distributed by
