

WHERE DOES OUR MILK COME FROM?

Unlike other infant formulas sold in Australia, the milk in Pinnacle Premium Gold is from Australian cows. Australia has some of the world's most pristine pastures and is renowned for having some of the best dairy produce in the world.

Pinnacle Premium Gold infant formula is made solely from Australian milk and manufactured in Australia under comprehensive quality standards to ensure safety and quality. Pinnacle Infant Formula is exported throughout the world.

WHAT MAKES A PREMIUM GOLD INFANT FORMULA?

A Premium Gold infant formula contains additional ingredients which are also found in breast milk and may be important for infant growth and development.

Pinnacle Premium Gold Infant Formulas contain all of these additional ingredients:

- ✓ DHA + ARA (Omega 3+6) fatty acids – for brain and nerve development
- ✓ Prebiotics GOS + FOS – for a healthy digestive system
- ✓ β-Carotene, Lutein, Taurine – for healthy eyes
- ✓ Nucleotides – supports immunity
- ✓ Inositol & Choline – brain development
- ✓ Lactoferrin – for a healthy immune system

BREAST IS BEST

The benefits of breast milk are limitless for both mother and baby. As an amazing gift from Mother Nature, breast milk naturally meets your baby's dietary requirements for rapid growth and development. Breast milk contains properties which strengthen a young infant's developing immune system and it is an excellent source of nourishment.

However, infant formula has been made to provide the same nutritional value that breast milk offers. Thankfully, there is also a method of bottle feeding your baby with love which can duplicate the same conditions as breast fed babies.

FEED YOUR BABY WITH CONFIDENCE
